

We offer
productivity
tools that can
help you to organise
and develop your
ideas and support your
reading and writing

MindView and **ClaroRead** are software that can enable you to study more effectively. Both tools are available to all students and staff on college PCs

MindView can help you with:

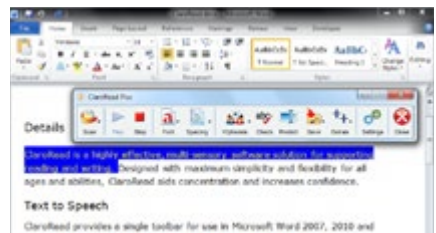

- mind-mapping for essay planning, reports and revision
- hyperlinks and attachments
- making timelines
- producing Gantt charts for projects

For more information go to:
matchware.com/mind-mapping-tutorials

ClaroRead can be used to:

- read text aloud on the web, in PDFs, in Word docs, while writing etc.
- spell check and check for alternative words with vocalised feedback
- change the screen tint
- homophone check

For more information go to:
clarosoftware.com/helpvideos

To find this software, look on the desktop and click on  or
